## EDUCATION

**Indus University** (currently pursuing)

B.Tech in Computer Science and Engineering (CGPA: 8.90)

**Ahmedabad, Gujarat, INDIA**

Graduation: May 2023 (tentative)

**St.Xavier's High School, Loyola Hall**

Higher Secondary School (12th) (66%)

**Ahmedabad, Gujarat, INDIA**

Graduation: 2019

## EXPERIENCE

**LetsGrowMore**

Data Analytics Intern

**Remote** ([GitHub link](#))

July 2022 - August 2022

- Implemented 4 machine learning projects which included ideal solutions to real life problems like converting images to pencil sketches and using neural networks to read handwriting.
- Handled scenarios associated with debugging, optimising code, improving time complexity and finding the best approaches for particular problems.

**Acute Informatics Pvt. Ltd.**

Software Development Intern

**Ahmedabad** ([Certificate link](#))

December 2022 - April 2023

- Worked on building a Loan Origination System for private financial institutions/corporate banks along with a Billing System to manage any buyer & seller's product information.

## PROJECTS & CERTIFICATION

**Loan Origination System**

Personal

**Internship**

([GitHub Link](#))

- Created a dual portal system using ReactJS, Node & MongoDB which would allow lenders to seamlessly manage loan inquiries and clients to apply for loans without any hassle.

**Billing System**

Personal

**Internship**

([GitHub Link](#))

- Created a software meant to generate invoices of any goods transaction and keep track of all the product information which would allow smooth scaling of the business using ReactJS, Node & MongoDB.

**Future of 5G Wireless Technology**

Review Paper (unpublished)

**Under University HOD's guidance**

([Google Drive link](#))

- Outlined a summary of the advent of 5G technology and its current situation in the real world along with its applications and possibilities.

**Coursera**

University certified courses

**Online**

- Java for Android by Vanderbilt University
- Python Data Structures by University of Michigan
